

# Aid Data of Countries:Project 3 Viz - 1

## Aid Data

Create an overview of the relationships between countries so that it is possible to see who donates to whom and how much. Questions one should be able to answer are: 1) Who are the major donors (in terms of donation amount) and to which countries do they donate the most? And conversely, who are the major receivers and which countries do they receive from the most? Optional: 2) Are there groups of countries that tend to donate/receive to/from a similar set of countries?
